may be issued. This law firm represents both companies and has been expressly authorized to submit this application.

Space Research Corporation, S.A. has been requested by the Iraqi State Enterprise for Automotive Industries to supply the following computer equipment, for use by that agency:

Quantity	Commodity Description	Value
2	W-4D20G-S38 Personal Iris Super 380 Computer	\$102500
4	H5-CO4A 4MB CPU Memory	\$ 29300
1	P5-T4C2 Cartridge Tape Drive	\$ 2930
1	P4-D38Z Add-on 380MB Disk Drive	\$ 17575
1	P4-BBXD Buttons Box and Dials	\$ 8775
	Total Value	\$161080

Each of these items is one which bears ECCN 1563A.

The original manufacturer of each of these items is Silicon Graphics, a computer manufacturer located in Mountain View, California. I have been provide the following further descriptions of these items by Silicon Graphics, for your reference.

1. W-4D20G-S38 Personal Iris Super 380 Workstation. This computer workstation is equipped with a floating point co-processor and has a processing data rate, within the meaning of the Export Administration Regulations, of 318.6 megabits per second. The original equipment is distributed with 8 MB of main memory in each workstation, expandable to a total of 16 MB per workstation. The equipment is distributed with a 19 inch 1280 x 1024 color monitor, a keyboard, a mouse, the UNIX System V.3 operating system, an internal 380 MB (unformatted) Winchester disk drive with an SCSI controller, an Ethernet LAN port with TCP/IP, and documentation. A more complete description of the equipment is contained in the brochures, supplied by Silicon Graphics, copies of which are enclosed.

2. H5-CO4A 4MB CPU Memory. These modules will upgrade the main CPU memory in each of the two workstations from 8 MB to 16 MB.

3. P5-T4C2 Cartridge Tape Drive. This bulk storage device is a 150 MB SCSI 0.25 inch streaming tape drive, with cables and documentation, designed for backing up data stored on the hard drives.

4. P4-D38Z Add-on 380MB Disk Drive. This drive is shown as an option on the brochures supplied by Silicon Graphics, and is a 380 (unformatted) Winchester disk drive with an SCSI controller, designed for installation as a primary or secondary drive in one of the two workstations.

5. P4-BBXD Buttons Box and Dials. These sets each contain 32 buttons, 8 dials and a four character display for Personal IRIS systems, and include cables, power cords and installation manuals.

These items were originally supplied to Structural Dynamics Research Corporation, 2000 Eastman Drive, Milford, Ohio 45150, or to its Netherlands affiliate, SDRG, CAE International, Druivenstraat 3, 4816 MB Breda, The Netherlands. The items are now owned by the latter company, and are physically in Europe.

Space Research Corporation, S.A. has entered into an agreement with SDRG, CAE International, the Netherlands company, to purchase the items described in this letter, provided that authorization may be obtained for their reexport to the State Enterprise for Automotive Industries, in Iraq.

You will also find enclosed the original copy of a Statement by the Ultimate Consignee and Purchaser (Form ITA-629P), executed by the Iraqi State Enterprise for Automotive Industries. Attached to the Statement is a brief memorandum provided by that agency, describing the agency, its purpose, products and intended use of the items described in this letter, authorization for whose reexport is sought by this letter.

The Statement by the Ultimate Consignee and Purchaser (Form ITA-629P), executed by the Iraqi State Enterprise for Automotive Industries, describes other items which it was thought originally might be exported or reexported from the United States to the Iraqi State Enterprise for Automotive Industries. In particular, the form refers to two software packages, Fortran 77 and a Development Environment, which may have been obtained from Silicon Graphics or SDRG. However, a request for authority to export or reexport those items is requested by this application.
